ACADEMIC PROJECTS

[Aafno Store](#) *(Group Project)*

A fullstack interior design e-commerce website built in Java, featuring product listing, shopping cart, and basic order management with a user-friendly interface for browsing and purchasing interior products.

[Skincare Wholesale System](#) *(Individual Project)*

A desktop-based skincare wholesale management system built in Python to manage product records, stock levels, and basic sales operations, enabling easier tracking of inventory and wholesale transactions.

PERSONAL PROJECTS

[Portfolio](#)

A clean and responsive portfolio website showcasing web development projects and skills, built with HTML, CSS, and JavaScript with a focus on professional presentation and smooth navigation.

[Skincare Website](#)

A dynamic skincare e-commerce website built with HTML, CSS, and JavaScript, featuring product filtering, interactive shopping cart functionality, and a clean, user-friendly interface.

[To-Do List](#)

A responsive To-Do List application built with HTML, CSS, and JavaScript, allowing users to add, delete, and manage daily tasks efficiently with an intuitive interface.

[Rock Paper Scissors Game](#)

An interactive Rock Paper Scissors game developed with HTML, CSS, and JavaScript, featuring gameplay logic, score tracking, and a clean visual design.

[Tic Tac Toe Game](#)

A classic Tic Tac Toe game built with HTML, CSS, and JavaScript, supporting two-player gameplay, winner detection, and game reset functionality.
